

Alkoxy Silicone Fluid LF-M107

Description:

LF-M107 end groups is single end-capped alkoxy-terminated silicone fluid. It is a range of linear or branched alkyl/alkoxy functional silicone fluids with high reactivity and clarity.

The structure is as follows:

Typical Technical Properties:

Item	LF-M107	LF-M107	LF-M107
End-capping	Alkoxy single end capped		
Appearance	Transparent to light yellow transparent liquid		
Viscosity (25°C, mpa.s)	30	50	70

Applications:

This material is the base polymer for formulating special silicone rubbers, gels, greases or foams. It is widely used in various hybrid silicone polymer applications, including conductive silicone adhesives or thermal conductive solutions.

Package &Storage:

In 25kg pail, 200kg drum and IBC.

Keep in cool, dry and ventilated place. Keep away from sunlight and fire sources. Keep in unopened containers, shelf life is 12 months from the date of production. It is shipped as non-hazardous substance. Storage beyond the shelf life does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.
